4. User Manual (1pc)
5. Position paper (1pc)

PRODUCT DIAGRAM

SIM CARD-INSTRUCTIONS

- 1) Use a nano SIM card with active mobile data.
- 2) The SIM card must not have a PIN code enabled- disable it before inserting.
- 3) Insert the SIM card into the slot marked for the mobile network, alongside the TF(SD) card.
- 4) After insertion, the device will automatically attempt to establish a 4G connection.
- 5) If any issues occur, check whether the SIM card has a strong signal and active mobile data.

PROCESS

1. Solar panel: connect panel to camera, fix a suitable angle with screws
2. SD card installation: open the silicon flap and insert the SD card, then make sure to close the silicon flap to avoid rain leakage
3. Insert TF card, Along with the TF card, insert a 4G nano SIM card into the designated slot. Make sure the SIM card has active mobile data (it is recommended to disable the PIN for automatic connection). Tighten the screws. Power cable connect the cables between the panel and camera, then tighten the waterproof cap.
4. Panel power-on: Remove the rubber of panel, make sure it is power on. Then put the rubber back to the panel.

INSTALLATION

APP INSTALLATION

Step 1: Turn the power button ON of the device. Then follow the below instruction for the device.

Step 2: Scan the given QR code, or download "Smart Life" from the App Store (iOS) or the Google Play Store (Android).

Step 3: Open the Smart Life app and tap on register for creating a new account. If you already have an existing account, please proceed to please proceed to logging in. (Ref Fig 1)

NOTE:

Before powering up the device, check if you have inserted a 4G SIM card. Without it the device won't be connected to the network.

AUTO-PAIRING

1. Enable Bluetooth and Home Wifi for the device to access your wifi connection for pairing. It will automatically find the nearest device.

2. Click “Scan” icon in the top right corner.

MANUAL PAIRING

1. Select the Smart Camera (Wi-Fi) option from the devices list.

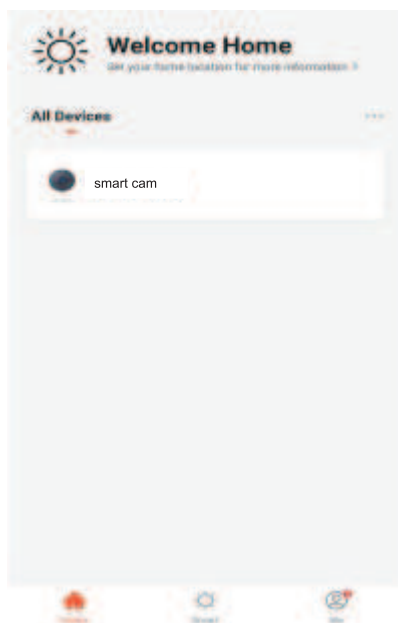

6. Enter 2.4Ghz Wi-Fi network details and connect to proceed

Step 7: Once you have successfully completed step 6, will show the QR code. Show this QR Code to the camera face with the distance of 15-20cm away. Camera will automatically detect the QR code and start to pair.

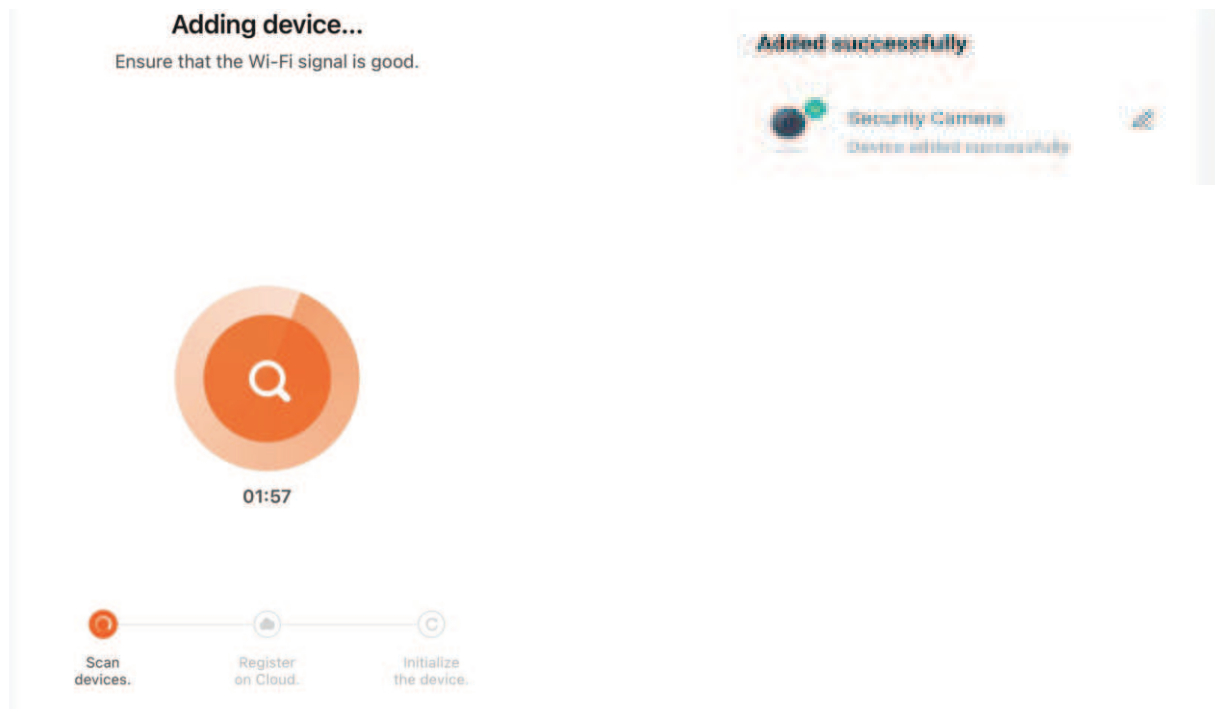

Step 8: After successfully pairing the ptz camera with the app, you can start controlling multiple features of the ptz camera through your mobile — speak, rotating the camera, and more.

Recording saved to Gallery.

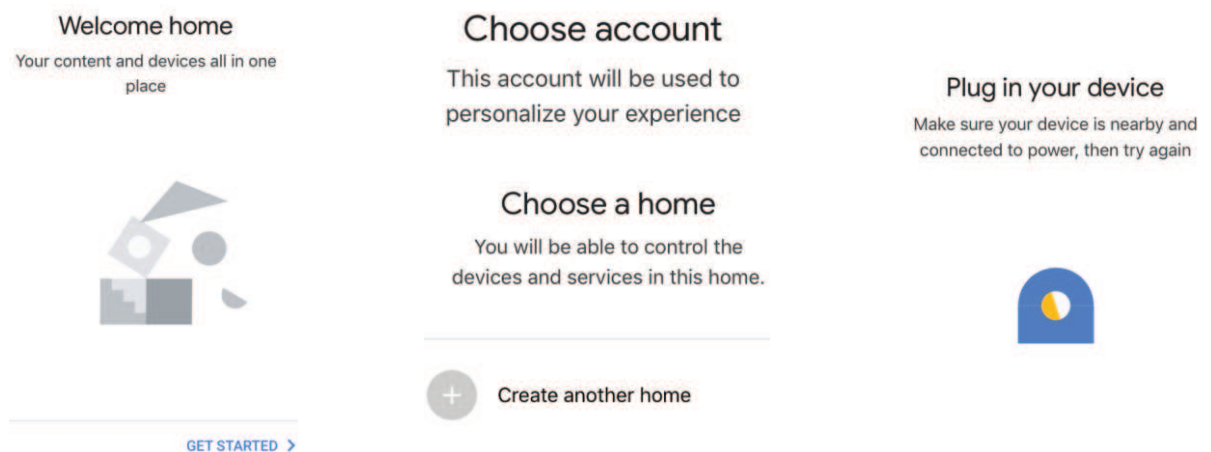

Step 12: Once your device is successfully added, rename the device to your preference.
